

ProcessModel End-User License Agreement

PROCESSMODEL DESKTOP APPLICATION SOFTWARE

This is a legal agreement between you (an individual or an entity), the end user, and ProcessModel, Inc. This applies to the software named above, which includes the media on which you received it, if any. If you do not agree to the terms of this Agreement, promptly return this product and accompanying items (including written materials and binders or other containers) to the place you obtained them for a full refund. BY INSTALLING, LICENSING, OR OTHERWISE USING THE SOFTWARE PRODUCT OR ITS SERVICES, YOU AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. These terms also apply to any ProcessModel updates, supplements, model objects, Internet-based services, model building services and support services for this software, unless other terms accompany those items. If so, those terms apply.

AS DESCRIBED BELOW, USING THE SOFTWARE ALSO OPERATES AS YOUR CONSENT TO THE TRANSMISSION OF CERTAIN COMPUTER INFORMATION DURING ACTIVATION, VALIDATION, UPDATES, AND FOR INTERNET-BASED SERVICES. IF YOU COMPLY WITH THESE LICENSE TERMS, YOU HAVE THE RIGHTS BELOW FOR EACH LICENSE YOU ACQUIRE.

1. **OVERVIEW.** The software is licensed on a per copy per device basis. A hardware partition or blade is considered to be a separate device.
2. **INSTALLATION AND USE RIGHTS.**
 - a. **One Copy per Device.** This ProcessModel End-User License Agreement (“this License”) permits you to use one copy of the ProcessModel software product (“the Software”) on any single computer. That device is the “Licensed Device.” You must acquire and dedicate a license for each separate computer on which the Software is installed or run from the storage device. A License for the Software may not be shared or used concurrently on different computers.
 - b. **Licensed Device.** You may only use one copy of the Software on the licensed device at a time.
 - c. **Portable Device.** If the Software is permanently installed on the hard disk or other storage device of a computer, then the person authorized to use such computer also may use the Software on a portable computer, laptop, tablet, or home computer so long as the Software is not used on both computers at the same time.
 - d. **Separation of Components.** The components of the software are licensed as a single unit. You may not separate the components and install them on different devices.
 - e. **Alternative Versions.** The software may include more than one version, such as 32-bit and 64-bit. You may install and use only one version at a time.
 - f. **Rights to Use.** If the person’s authorization to use the Licensed Device ceases for any reason (e.g. termination of employment), then such person’s authority to use the software on a portable computer, laptop and home computer will cease.
 - g. **Network Server.** A LAN (Local Area Network) connection/link is required between the server and the client(s). Installation and/or usage of a network server will require a license for every user who accesses the Software at any time.
 - h. **TRANSFER TO A THIRD PARTY.** The first user of the software may make a one-time transfer of the software and this agreement, by transferring the genuine proof of license directly to a third party. The first user must remove the software before transferring it separately from the licensed device. The first user may not retain any copies of the

software. Before any permitted transfer, the other party must agree that this agreement applies to the transfer and use of the software. If the software is an upgrade, any transfer must also include all prior versions of the software.

- i. **UPGRADES.** If the Software is labeled as an upgrade, you must be properly licensed to use a product identified by ProcessModel as being eligible for the upgrade in order to use the Software. The Software labeled an “upgrade” replaces and/or supplements the product that formed the basis for your eligibility for the upgrade. The upgrade may not be separated for use from the product, or transferred separately or used on more than one computer except as set forth above.
 - j. **LICENSE EXPIRY.** Software license will expire if the version purchased becomes more than 1 version old, and is not maintained with Maintenance & Support (M&S). Example: version 5.5 will expire when version 5.7 or above is released and M&S for the license has expired. A user may continue to use an old version that has been previously installed and licensed in agreement to the terms of this license agreement, until it is removed or uninstalled. A new license will not be provided for an expired license.
- 3. ADDITIONAL LICENSING REQUIREMENTS AND/OR USE RIGHTS.**
- a. **Multiplexing.** Hardware or software you use to pool connections, reroute information, or reduce the number of devices or users that directly access or use the software (sometimes referred to as “multiplexing” or “pooling”), does not reduce the number of licenses you need.
 - b. **Use with Virtualization Technologies.** Instead of using the software directly on the licensed device, you may install and use the software within only one virtual (or otherwise emulated) hardware system on the licensed device.
 - c. **Remote Access.** The single primary user of the licensed device may access and use the software installed on the licensed device remotely from any other device. You may allow others to access the software to provide you with support services. You do not need additional licenses for this access. No other person may use the software under the same license at the same time for any other purpose.
 - d. **Trial and Conversion.** Some or all of the software may be licensed on a trial basis. Your rights to use trial software are limited to the trial period. The trial software and length of the trial period are set forth during the activation process. You may have the option to convert your trial rights to subscription or perpetual rights. Conversion options will be presented to you at the expiration of your trial period. After the expiration of any trial period without conversion, access to the software will be locked.
 - e. **Subscription Software.** If you licensed the software on a subscription basis, your rights to use the software are limited to the subscription period. You may have the option to extend your subscription or convert to a perpetual license. If you extend your subscription, you may continue using the software until the end of your extended subscription period. See the software activation screens or other accompanying materials for subscription details. After the expiration of your subscription, access to the software will be locked.
- 4. MANDATORY ACTIVATION.** Activation associates the use of the software with a specific device. During activation, the software will send information about the software and the device to ProcessModel. This information includes the version of the software, language, operating system, client information provided manually, hardware key of the software, the Internet protocol address of the device, and information derived from the hardware configuration of the device. BY USING THE SOFTWARE, YOU CONSENT TO THE TRANSMISSION OF THIS INFORMATION. If properly licensed, you have the right to use the version of the software installed during the installation

process up to the time permitted for activation. UNLESS THE SOFTWARE IS ACTIVATED, YOU HAVE NO RIGHT TO USE THE SOFTWARE AFTER THE TIME PERMITTED FOR ACTIVATION. This is to prevent its unlicensed use. YOU ARE NOT PERMITTED TO BYPASS OR CIRCUMVENT ACTIVATION. You can activate the software by Internet, email, or telephone. If you do so, Internet, email, or telephone service charges may apply. Some changes to your computer components or the software may require you to reactivate the software. THE SOFTWARE WILL REMIND YOU TO ACTIVATE IT UNTIL YOU DO.

5. **INTERNET-BASED SERVICES.** ProcessModel provides Internet-based services with the software. It may change or cancel them at any time.
 - a. **Consent for Internet-Based Services.** The software features described below connect to ProcessModel or service provider computer systems over the Internet. In some cases, you will not receive a separate notice when you connect. In some cases, you may switch off these features or not use them. USING THESE FEATURES, YOU CONSENT TO THE TRANSMISSION OF THIS INFORMATION. ProcessModel does not use the information to identify or contact you.
 - b. **Computer Information.** The following features use Internet protocols, which send to the appropriate systems computer information, such as your Internet protocol address, the type of operating system, and name and version of the software you are using, and the language code of the device where you installed the software.
